About GATIS Solutions

Global Asset Tracking & Identification Systems

GATIS is a robust, secure and comprehensive Auto-ID system, with a Logistic and Asset management application platform that integrates GPS and RFID data for business operation management and decision making. GATIS allows the use of integrated GPS/RFID data across a wide business spectrum from Shipping and Logistics operations to Oil Pipeline monitoring and Workforce Optimization.

GATIS is a highly unique platform with critical data analysis tools based on user configured business intelligence. Implemented across a broad spectrum of business operations, the system is designed in modular form allowing users to choose the applications most suited to their business and operation.

GATIS is designed to work with our LogiBoxx device which communicates wirelessly with RFID interrogators. When used with LogiBoxx, GATIS turns complex passive business data into actionable intelligent business information for decision making tools and operation management.

Software Modules:

- Supply Chain Management
- Workforce Management
- Demand Visibility
- Warehouse Operations
- Fleet Management
- Utility and Oil Pipeline Monitoring
- Access Control
- Facility Management
- Transportation Management

General Utilities

- Report
- Monitoring Dashboard
- Admin & system configuration tools
- Performance analytics

System Set Up

- Operating system: Windows
- Database: Oracle 11G Database Platform with redundancy
- Programming Language: Java, SQL, PHP
- Map source: Google
- Can be integrated with other map platforms

Other

- Integration with ERP systems
- Integration with 3rd party devices and portals
- Web Services for data exports
- Report exportable to Excel and CSV files
